

DRUG DETECTION & IDENTIFICATION

Aerosols

Detects trace amounts of illicit drugs

Field test kit with immediate results

For use indoors or outdoors in any weather condition

**Fast and easy to use
No special training required**

Wipe the suspected surface, spray with the related aerosol

Instant color reactions indicates the type of drug

Sensitive, detects as little as 1 nanogram of substance

**Immediate Results • Accurate • Sensitive
Inexpensive • Safe • Easy to Use**

 **MISTRAL GROUP**

Our Collection of drug detection, identification products provide law enforcement officers and investigators distinct advantages for field and laboratory use. As with all Mistral products, they are first and foremost non-toxic, non-carcinogenic and will not harm the environment. In addition, they insure a testing process which is convenient, fast and efficient. No glass ampoules, spatulas or waiting time required. Results in seconds. The identification/detection process requires no special training and testing can be performed "on the spot".

Detect 4 Drugs (D4D) is an aerosol reagent spray that will detect and identify several drugs at once. Wiping any surface once with the special Test Paper #630, and spraying the paper with the reagent from this can, will reveal traces of:

Hashish and Marijuana, as reddish brown stains, Heroin, and/or LSD, Opium as purple gray stains, Amphetamines, as canary-yellow stains and Methamphetamines, as orange stains.

CANNABISPRAY is an aerosol based field test kit for the detection and identification of marijuana, hashish and related drugs. Cannabispray contains a patented modified Fast Blue BB reagent. Product modifications have been

incorporated to reduce the number of false positives, remove suspected carcinogenic elements and stabilize this well known reagent. Using our Collection Paper, #0530, simply wipe the suspected surface or touch the substance. Spray first with Cannabispray #1 and then with Cannabispray #2. A reddish brown color reaction on the Collection Paper indicates a positive reaction.

COCA-TEST is an aerosol-based field test kit for the detection and identification of Cocaine, Crack and PCP. Coca-Test contains a patented, modified Cobalt Thiocyanate (Scott) reagent. Using our Collection Paper #0530, simply wipe the suspected

surface or touch the substance and spray with Coca-Test. A turquoise color reaction on the Collection Paper indicates a positive reaction.

METH-TEST is an aerosol-based field test kit for the detection and identification of Methamphetamines (MDMA) and related drugs. Meth Test contains a modified Simon reagent. Product modifications have been incorporated to reduce the

number of false positives, stabilize the traditional Simon reagent and eliminate sensitivity to temperature extremes. Using our special Test Paper, #0630, simply wipe the suspected surface or touch the substance. Spray first with Meth-Test#1 and then with Meth-Test#2. A dark blue color reaction within 30 seconds on the collection paper indicates a positive reaction.

HEROSOL is a unique, aerosol-based field test kit for the detection and identification of Heroin, Amphetamines, Methamphetamines, LSD and related drugs. Using our Collection Paper #0530, simply wipe the suspected

surface or touch the substance and spray with Herosol. A purple color reaction on the Collection Paper indicates a positive reaction.

* All tests are also available in drops form.
